

GRYPHON FLEXIBLE FUND OF FUNDS – 31 AUGUST 2017

FUND PROFILE & PERFORMANCE OBJECTIVE

The primary objective of the fund is to generate real (after-inflation) wealth for investors, at lowest possible cost, with due cognizance of risk and in particular secular down side risk. This is achieved by consistently producing real returns and long-term capital growth through maximum exposure to equities (the asset class of choice over the long-term to protect investors against inflation) during bull markets, whilst minimising exposure to equities in secular bear markets. As such, the product is suitable for investors of all ages as it maximises return per unit of risk throughout their various life stages.

INVESTMENT POLICY & STRATEGY

The portfolio is premised on the philosophy that most value is added with asset allocation rather than with stock selection. Stock selection is indexed and asset allocation is actively and aggressively managed to the extreme. This, coupled with our low cost focus (utilizing indexation building blocks), has the objective of achieving superior investment returns. The portfolio investment strategy is to invest in a flexible combination of the Gryphon All Share Tracker Fund, Gryphon Money Market Fund, Gryphon Global Equity Fund, offshore cash and bond/property indexed products. Funds are allocated between these alternatives based primarily on proprietary quantitative indicators, which predict the primary bull / bear market cycles in equities and the Rand currency. Short term equity volatility and secondary market cycles are generally ignored, since they are more difficult to predict and their effect on portfolio returns relatively small and short lived. The Portfolio can invest up to a 100% in equities (including international equities). Maximum foreign exposure limits as permitted by prevailing legislation (currently 25%), apply.

WHO SHOULD INVEST?

- Investors seeking long term exposure to equity market returns, but cognizance of downside risk.
- Investors who have a long-term investment horizon and a required return profile in excess of inflation and which thus necessitates exposure to equities.
- Investors lacking the time, infrastructure or resources and/or investment sophistication to choose between and subsequently monitor the performance of: various asset classes i.e. asset allocation; and/or individual stocks i.e. stock selection; and/or individual asset managers i.e. manager selection.
- Investors cognizant of the effects of costs on their returns.
- Multi Asset Funds are more tax compliant and tax efficient.

The fund is particularly attractive to investors from a diversification point of view, since the unique way in which it is managed, differs significantly from its peers.

Further information regarding the Gryphon Flexible Fund of Funds is available on our website www.gryphon.com or by contacting us on 021 915 5100 or at invest@gryphon.com

ASSET ALLOCATION

FUND DETAILS

Sector Classification:
SA Multi Asset Flexible

Portfolio Managers:
Abri Du Plessis
M.Comm (Econometrics)
Reuben Beelders
B.Comm (Hons), CA(SA), CFA

Benchmark:
CPI + 7%

Inception Date:
01 April 2014

Portfolio Size:
R19 033 419

GRYPHON MARKET COMMENTARY – 31 AUGUST 2017

THE PAST													
INTERNATIONAL						LOCAL							
<p>Global equity markets continued to rally. Emerging Markets outperformed World Markets by 2.1%. LatAm, driven by Peru (+8.5%), Brazil (+6.3%) and Chile (+5.4%) was the best performing region. However, currency strength also assisted strong gains from Russia, Hungary, Poland and Turkey. It would appear that the “Fragile Five” are less fragile. Materials, Energy and Telecoms were the best performing equity sectors. US Dollar weakness coupled with strength in commodity prices has driven Emerging Market performance. We see this trend as likely to continue. However, the movement in long bonds has gone against our expectation and is a development we are watching closely.</p>						<p>Following the very strong +7.65% return for July, local equities delivered another strong month, +2.65%. A number of active managers have not been well positioned to benefit from the returns of the past two months. This once again, highlights the benefits of indexation, with index returns outperforming most active managers. Year to date performance has been driven by Exxaro (+51%), Naspers (+46%), Kumba (+44%). On the negative side ArcelorMittal (-57%), Brait (-33%) and EOH (-33%) have detracted from performance. While consumer-facing stocks have bounced post the cut in interest rates, the consumer continues to look weak.</p>

THE FUTURE													
INTERNATIONAL						LOCAL							
<p>The Central Bank conference at Jackson Hole under-delivered in terms of providing direction as to when and to what degree the ECB would reduce its policy of QE. However, North Korea did provide a level of uncertainty to markets with its missile testing, which kept euphoria in check. Adverse weather in the U.S. failed to ignite the oil price, which has us concerned. Our reference to long bond yields above is a function of an increasing concern that inflation remains muted. While this is ascribed to (1) technological innovation, (2) global oversupply, (3) China overcapacity and (4) falling inflation expectations; this development requires caution.</p>						<p>Local earnings releases have been in line with expectation. We are seeing an increasing sign of a slow-down in the construction in retail space, both locally and abroad. Recent results from Spur point to a consumer focused on non-discretionary purchases and confirm a trend observed in the Famous Brands results a few months ago. While lower interest rates will assist stretched consumers, banks and retailers are battling to generate profit. Companies exposed to the Rest of Africa are also downbeat on prospects. New listings in the form of Steinhoff Retail Africa and African Rainbow Capital should keep punters happy in September. We continue to see value in large capitalization Rand hedges, which are well represented in the All Share. This is likely to result in the continuation of the trend of outperformance of indexation over active management.</p>							
OUR FUNDS													
RISK	GRYPHON FUND						POSITIONING						
LOW	Money Market Fund						Conservatively managed, superb yield.						
↑	Dividend Income Fund						Enhanced before tax yield of + / - 10.00%. Attractive relative to other interest rate products.

FAIS NOTICE and DISCLAIMER: This document is a minimum disclosure document. Collective Investment Schemes (“CIS”) or Unit Trusts are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Fluctuations or movements in exchange rates may cause the value of the underlying international investments to go up or down. CIS unit prices are calculated on a net asset value (“NAV”) basis, which is the total value of all assets in the portfolio including income accruals and less any permissible deductions from the portfolio. Forward pricing is used. A schedule of fees, charges and maximum commissions is available on request from Gryphon Collective Investments. A Fund-of-Funds is a portfolio that invests in other portfolios of CIS (Unit Trusts), which levy their own charges, which could result in a higher fee structure for the Fund-of-Funds. A money market portfolio is not a bank deposit account. The value of the price is on an accrual basis. The total return is made up of interest received and any gain or loss made on any particular instrument; and in most cases the return will merely have the effect of increases or decreases in the daily yield, but in the case of abnormal losses it can have an effect of reducing the capital value of the portfolio. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressure; and in such circumstances a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. Gryphon Collective Investments reserves the right to close and reopen certain funds from time to time in order to manage them more efficiently and in accordance with mandates. The fund manager may borrow up to 10% of the market value of a portfolio to bridge insufficient liquidity. The CIS are traded at ruling prices and may engage in securities borrowing and scrip lending. Portfolio performance is based on a lump sum investment, calculated on a NAV to NAV basis and does not take any initial fees into account. Income is reinvested on ex-distribution date. Total return performances are published. Performance figures used are on an annualised basis and are the figures as at month-end quoted against relevant benchmarks for a minimum period of one rolling year and in multiples of full years for periods longer than one year. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. The Total Expense Ratio (“TER”) is a measure that can be used by investors and advisors to determine how much of a Financial Product’s underlying assets are relinquished as payment for services rendered in the administration of the Financial Product (e.g. manager fees & charges, administration fees and charges and VAT thereon, etc.). Transaction Costs (“TC”) is a measure that can be used to determine the costs incurred in buying and selling the underlying assets of a Financial Product (e.g. brokerage, VAT on brokerage, securities transfer tax, etc.). TER’s & TC’s are expressed as a percentage of the daily NAV of the Financial Product calculated over a period of three years on an annualised basis. TC’s are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER. A higher TER & TC does not necessarily imply a poor return, nor does a low TER & TC imply a good return. The current TER & TC may not necessarily be an accurate indication of future TER’s & TC’s. Gryphon Collective Investments and the portfolio manager(s) cannot guarantee the capital or return of the portfolio. Gryphon Asset Management (Pty) Ltd, (FSP 581) is a licensed financial services provider in terms of the Financial Advisory and Intermediaries Services Act 37 of 2002.
